

Instructions to gFlash+ for iPhone, iTouch, and Blackberry devices

gFlash+ is a free App from <http://www.gwhizmobile.com>

There are a couple of ways to get to the appropriate App, but the easiest method is to click on the gwhizmobile link above and look for the section that pertains to your device (one section for Apple products and another for Blackberry products).

For iPhone/iTouch users, select the “gFlash+” Flashcards (FREE)...it will open in iTunes and you can download the App.

For Blackberry users, it is NOT READILY VISIBLE, but you CAN get the FREE version...read down a bit further where it details what to do to get the FREE version.

Once you've installed the FREE version, you'll need to look up and install the “cardset” (just a fancy name for the “deck of flashcards”). To do that:

- 1) open the App and click on Menu in the upper left corner.
- 2) Select “Search gWhiz Catalog”
- 3) Type in Realidades in the search field and tap search
- 4) Select which “cardsets” you need (Realidades 1A is 7th grade and Realidades 1B is 8th grade)

Once the cardset is downloaded to your device, you won't need internet connection to go through the flashcards.

Stay tuned...More “cardsets” to follow!

Gracias
